Julie and Linda,

See email request below for results from the Chemours onsite test well monitoring. Were these results made public? Are we ok to make available to Emily Donovan?

Tim

Subject: RE: Chemours groundwater testing

Hi Emily,

In concert with the NCDEQ we did do some sampling and analysis of PFAS from monitoring wells from the Chemours property. This information was shared with the NCDEQ back on September 21st according to the report date. Yes we did do non-targeted analysis for the same suite of PFAS we did for every other water sample we received over the summer/fall as part of the NCDEQ efforts. I see online they have the GenX data for those wells as well as PFOS and PFOA shown but not for the other

analytes. https://files.nc.gov/ncdeq/GenX/GenX%20Sampling%20Map%2020170906_3.pdf This data likely came from the contract lab that was also doing analysis of samples from the site.

Tim is there any reason we can't share that report we sent to NCDEQ with Emily?

Mark

Hi Mark,

We met late last year when I toured the EPA. Have you done any groundwater testing for under the Chemours Fayetteville Works Site? Specifically non-targeted analysis. If so, could you please share your data with me?

Hope all is well.

All the best,

--

Emily Donovan
